Panic Bars

Panic bars are the push bars installed on an exit gate to allow free or emergency exit. A Panic bar will also provide any unauthorized entry. Panic bars are available in several types. Our sales representative will be able to access your needs and recommend which type will work best for your application.

Basic Panic Bar

This basic model will work for most situations. A panic bar installation will require the mesh size to be reduced from a 2" to a 1" opening. A mounting plate is typically added for extra security. Mounting plates are typically 24" high and can be adjusted for a 32" to 54" wide gate frame. A lockbox make it possible to gain access from outside the gate by using a key. Available with keyed alike cylinders. The lockbox also be used with a "Best" core cylinder.

Panic Bar with Alarm

Approximately 100 db alarm powered by a 9 volt battery. Low battery alert. Weather resistant. Black ABS cover on head and push bar. Reversible.

Door Closer

Heavy duty closer designed for high use applications. Works with your panic bar to close your gate and provide the security and safety you need.

- Cast Iron
- Closes quietly and firmly
- Wide range of options available to fit your specific needs.
